About Me

Dedicated and detail-oriented final-year engineering student with a strong foundation in programming languages like Python ,C and SQL. Skilled in problem-solving and collaborating on technical projects, with a passion for developing innovative software solutions. Eager to apply academic knowledge and grow as a software trainee in a dynamic environment.

Education

Cambridge Institute of Technology, North Campus 2022 – 2026
Bachelor of Computer Science Engineering
CGPA: 7.61

R T Nagar PU College, Yelahanka 2020 – 2022
Final Grade: 62%

Shri Bhakathanatha Swamy High School, BG Nagar 2020
Final Grade: 75%

Technical Skills

- **Programming Languages:** Python, C
- **Web Technologies:** HTML, CSS, JavaScript, React.js
- **Databases:** SQL
- **Tools:** Git, GitHub
- **Core Concepts:** DBMS, AIML, GenAI, MCP

Soft Skills

Communication
Teamwork
Leadership
Adaptability

Academic Projects

1. Rock Paper Scissors AI Game

- Designed and developed an interactive Rock Paper Scissors game using AI-based decision logic to simulate intelligent opponent behavior.
- Implemented real-time user input handling and result evaluation to provide an engaging and responsive gameplay experience.
- Focused on clean UI design, fairness in AI move generation, and smooth game flow to enhance user interaction and replay value.

2. Employee Management System

- Designed and developed a web-based application to manage employee records, including personal details, roles, and work information. Implemented CRUD operations to efficiently add, update, view, and delete employee data, improving organizational data handling.
- Focused on data security, role-based access control, and a user-friendly interface to ensure accurate and secure employee management.

3. Laser Mic (used for spying)

- Designed and implemented a laser-based audio detection system to capture sound vibrations from reflective surfaces using optical principles.
- Converted surface vibrations into electrical signals and processed the data to reconstruct audible sound.
- Focused on signal amplification, noise reduction, and accurate sound reproduction to demonstrate real-world applications of laser sensing technology.

Experience & Certifications

AI Intern – SLK

- Designed and developed an AI-based chatbot with integrated system-level file management using MCP tools
